SUMMARY

I'm an Undergraduate at Chaitanya Bharathi Institute of Technology, Hyderabad pursuing Information Technology, aspiring to expand my horizons of knowledge and keep working on building my skill set. I'm currently working my way up full stack development, starting from the front end.

PROJECTS

Amazon Clone Website - Project

[Link to Demo](#)

- Foundation to the Amazon Website.
- It includes a home page for the Website.
- The home page consists of a Navigation Bar which has basic content like the logo, search bar, sign-in option, cart, etc.
- A second Navigation bar.
- It contains the Hero section.
- It consists of multiple content boxes.
- It has a footer section which consists of more details.
- At the end there is a section with copyright information.
